

# Behavioral Based Safety

Employee engagement in safety programs across the organization is key to enhancing safety performance. Tracking and analyzing unsafe and at-risk behaviors and unsafe conditions in the workplace is a widely adopted approach to mitigate potential hazards and risks. However, many companies use traditional approaches to collect this information, limiting a holistic view of their risks.

ProcessMAP's Behavior Based Safety (BBS) module is an intuitive and easy-to-use tool for capturing and analyzing observational data for both Peer-To-Peer and Group observations. Our solution automatically compiles and analyzes the collected observations. No matter how many facilities you have, our robust application provides real-time insights on potential hazards and risks.

With ProcessMAP's native mobile app and its offline functionality, you can empower field workers to capture observations.

## Track & Analyze Unsafe Behaviors to Enhance Safety Performance

### Effectively Track Behavioral Data

Automated reports and alerts offer better visibility on behavioral data and the performance of the corrective programs related to employee behaviors.

### Report the Observations On-The-Go With Our Mobile App

The app allows you to access the platform on-the-go from any device, anytime - improving efficiency and reaction time. Offline functionality allows you to capture observations at remote locations as well.

### Better Communication for Strategic Decisions

Seamlessly measure employee engagement and feedback quality to increase the value and utility of BBS data, thereby enabling better strategic decisions.

### Reinforce Safety Focused Behavior

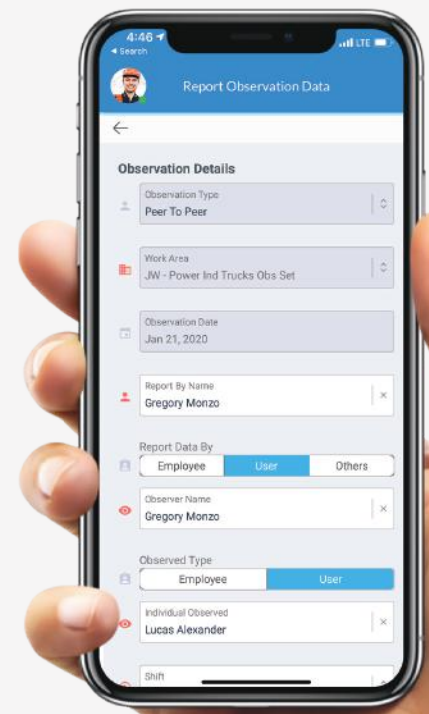

A centralized solution to track behavior, share feedback and institutionalize positive behavior aligning with the corporate safety culture.

# Behavioral Based Safety

## Solution Features

Progressive Organizations Are Using BBS to Optimize Safety Performance. ProcessMAP's Platform Empowers Organizations to Capture and Analyze Disparate Data in a Single Repository to Enable Better Strategic Decisions.

### Reinforce Safety Focused Behavior

- Easy and Multiple Data Entry Options
- Data Entry by Each Observer or by Team
- Capture Observation Data for Safe, Unsafe, Not Applicable & Feedback Given per Behavior
- Create and Manage Behaviors and Teams
- Automatic Data Rollup by Behavior, by Date and by Department
- Print Observation Cards
- Retire Behaviors Which Have Reached Habit Strength
- Ability to Add Comments When Additional Information and Clarification is Necessary

### Management Activity Scorecard

- Track Management Involvement in BBS
- Create and Schedule Management Activities (Daily, Weekly, Monthly and Quarterly)
- Allows Management to Complete Tasks online
- Establish Scores for Each Activity
- Automate Activity Scorecard Calculations
- Centralized Activity Trending
- Print Reports

### Corrective Action Item Tracking/Alerts

- Create Corrective and Preventive Actions
- Assign Ownership and Due Dates
- Ability to Require Verification Before Closure
- Ability to Configure Notifications, Reminders and Escalation Alerts
- Manage CAPAs in Central Repository/Calendar

### Management Activity Scorecard

- Number of Yes, No and Not Applicable Observations
- Total Observations
- Number of Feedback Given
- Number of Observation Cards
- Percent of Yes
- Percent of No
- Percent of Feedback Given
- Percent of Expected Observation Cards Submitted
- Trend on Number of Yes, No and Not Applicable Behaviors
