

Sustainability Performance Management

Forward-thinking organizations are realizing that sustainability performance indicators are analogous to financial performance indicators – both provide true, measurable health of the organization. Company - wide sustainability metrics are major components of accurate sustainability and corporate responsibility reporting. Without an integrated database platform, facilities typically report data in spreadsheets or disparate systems in various formats. Data validation, normalization and aggregation processes are becoming an increasingly time-consuming task.

For multinational organizations, lack of reporting in consistent units (e.g., tons vs. kilograms) adds additional manual data-conversion steps. In summary, without a common platform for corporate and facility EH&S/Sustainability Management teams, Sustainability Reporting could become an extremely inefficient and error-prone process.

ProcessMAP's Sustainability Performance Management solution is the most comprehensive platform designed to allow organizations to establish a 360 - degree performance management system to streamline every aspect of collecting, verifying, tracking, normalizing and analyzing company-wide sustainability, safety and social responsibility-related metrics. Our cloud-based solutions serve as the backbone of organizational Sustainability Goals and Objectives (G&O) tracking, Annual EHS Reports, Company Sustainability Reports, Company Social Responsibility Reports and more.

Track, Analyze, Verify, and Report Enterprise-wide Performance Metrics

Streamline Sustainability Data Collection

- Establishes enterprise- wide consistency in data collection and management
- Allows real-time tracking of sustainability performance
- Enhances data quality and auditability

Achieve Sustainability Goals

- Manage corporate and site - specific projects to achieve corporate missions and goals
- Enhanced visibility to performance of goals and targets

Improve Operational Efficiency

- Enables benchmarking for better business decisions to improve operational efficiency
- Insightful analytics and reports that enables informed decision making

Sustainability Performance Management

Solution Features

The Solution Provides Real-Time Visibility into EHSQ Performance and Helps Ensure Global Regulatory Compliance

Organization & Location Setup

- Setup Multiple Organization Types Like Company, Locations, Warehouses, Sales Offices, Departments, Regions, and Business Units
- Easy Reorganization from Acquisitions and Divestitures

Program Management

- Set up Multiple Programs for Multiple Years
- Selection of Locations & Sources
- Set Baseline Years by Location
- Set up Reporting Frequencies
- Set up Data Sources (Manual Entry or Automated)
- Set up Goals & Reduction Targets
- Set up Emission preferences
- Set up Validation Rules
- Configuration of Internal/External Verification Workflow
- Upload Documents and Pictures

Data Collection & Reporting

- Health & Safety Management
- Energy & Carbon Management
- Waste Management
- Water Management
- ODS/GHG Management
- Storage Tank Management
- Management of Asbestos Containing Materials
- Regulatory Certifications Management

Indicator Library

- 1,600+ Preloaded Key Performance Indicators (KPIs)
- Predefined Library of Indicators Based on GRI Standards
- Custom Indicator & Unit of Measurement Setup
- Set up Normalization Factors
- Formula Builder for Configuring Normalized KPI's

GRI Certified Software and Tools Program

- Reporting Capability in Brand New GRI
- Standards Robust and Transparent Reporting
- Facilitates Easier Data Collection
- Generates Standard and Custom Report
- Formats Establish Greater Data Integrity

Reports & Analytics

- Raw & Normalized Consumption of Emissions Data Reports & Charts
- Rolled up Reports at Site & Each Organizational Levels
- Baseline Year Comparison Reports & Charts
- CDP, DJSI, & GHG Protocol related reports
- No Activity & Data Variance Reports Configuration
- Ad-hoc Report Generation & Subscription
- Data Export Options (Excel, PDF, CSV, & XML)
