

LADDER INSPECTION CHECKLIST

Falls from ladders are one of the leading causes of occupational injuries. Ladder inspections can help ensure ladders are free from damage and safe work practices are followed.

ProcessMAP's Ladder Inspection app is designed to help employees evaluate the condition of ladders and flag ladders needing repair prior to use.

The Ladder Inspection app is built by EHS experts and allows clients to customize the checklist with company specific ladder inspection and out-of-service requirements.

Identify Deficiencies and Mitigate Risks on the go.

Key Features

Configurable - Modify to Fit Specific Business Needs

Mobile Online and Offline Capabilities
