

LOCKOUT / TAGOUT AUDIT

The Lockout / Tagout Audit app helps companies to maintain OSHA compliance by ensuring completion of annual audits on every machine-specific Lockout/ Tagout procedure. Users can easily conduct inspections of one or more authorized persons assessing their knowledge and the effectiveness of the procedures implemented. Corrective actions may be assigned and managed to closure to help ensure workplace safety and compliance.

The Lockout / Tagout Audit app is built by EHS experts and allows clients to customize the checklist with company specific requirements.

Assess LOTO procedures, ensure compliance, and track areas for improvement

Key Features

Configurable - Modify to Fit Specific Business Needs
