

MACHINE GUARDING ASSESSMENT

Operating machinery and equipment without proper guarding can result not only in workplace injuries, but also downtime, losses in production, and an increase in workers' compensation premiums.

Assess Machine Guarding, Identify Risks, and Apply Corrective Actions

ProcessMAP's Machine Guarding Assessment app is designed to help employees assess machine guarding to identify risks and manage corrective actions, reducing the likelihood for workplace injuries while helping to maximize productivity. The app provides a configurable checklist allowing organizations to assess compliance and risk based on regulations, industry standards, and company procedures.

Key Features

Configurable - Modify to Fit Specific Business Needs

Mobile Online and Offline Capabilities

Ability to Customize Notifications

Export Records in Excel and PDF Format

Create and Assign Action Items

Key Benefits

Easily assess machine guarding using configurable built-in checklist to identify deficiencies

One stop shop to create and manage action items to closure, reducing the risk of injuries and maximizing productivity

Ensure compliance with regulations, industry standards, and company requirements
